# Omar Faruque

PHP & NodeJS Developer | PHP, Laravel, NodeJS, ReactJS, VueJS  
Khulna, Bangladesh

## Summary

As a full stack developer with over six years of experience, I have designed, developed, and maintained exceptional web applications using PHP, Laravel, ReactJS, and other technologies. I have a postgraduate degree in Computer Science and Engineering, and an undergraduate degree in Marketing, which gives me a solid foundation in both technical and business aspects of web development.

Recently, I worked as a full stack PHP developer at Global AI Hub, where I had the opportunity to work on various exciting projects involving non-fungible tokens (NFTs), a domain that I am passionate and knowledgeable about. I collaborated closely with the design team and project managers to ensure that each project met the high standards set by the company. I also led teams of developers at Acodez IT Solutions Pvt. Ltd., where I delivered complex projects for clients across various industries, including custom e-commerce platforms, data-driven web applications, and responsive user interfaces.

My core competencies include developing and maintaining complex web applications and websites, both front-end and back-end, using a range of technologies including Laravel, PHP, HTML, CSS, JavaScript, ReactJS, VueJS and jQuery. I also have a deep understanding of back-end development, enabling me to design and optimize MySQL databases, build secure and efficient web applications, and integrate third-party APIs and web services. I am proficient in agile methodologies and project management, and I enjoy learning new technologies and pushing boundaries to deliver outstanding results. I am a proactive team player who values collaboration, communication, and quality.

## Experience

## Thrive Internet Marketing Agency

### Full-stack Developer

December 2023 - Present (9 months)

Thrive Internet Marketing Agency, Park Springs Blvd, Ste 100, Arlington, TX 76017

## Global AI Hub

### Full Stack Developer

September 2022 - May 2023 (9 months)

Maslak Mah. Büyükdere Cad. Uso Center Blok No:245 İç Kapı No : 56  
Sarıyer / İstanbul

As a full-stack PHP & JavaScript developer specializing in Laravel and VueJS at Global AI Hub, I developed and maintained advanced web applications across both front-end and back-end technologies, including PHP, HTML, CSS, JavaScript, and jQuery. My responsibilities included collaborating with design teams and project managers to meet our high standards, involving requirement analysis, solution design, and rigorous testing to ensure robustness and user-friendliness.

I contributed to diverse projects such as a real-time data analysis platform integrating multiple external APIs, a custom CMS for a major e-commerce site, and a CRM system for a multinational corporation. My role encouraged continuous learning through industry trainings and conferences, enhancing my development skills and keeping me updated with the latest technologies.

This role at Global AI Hub was not only challenging but also highly rewarding, allowing me to improve my technical skills and work alongside a team of talented professionals in a dynamic environment.

## Acodez IT Solutions Pvt. Ltd.

### WordPress Plugin Developer

November 2020 - September 2022 (1 year 11 months)

Kerala, India

As a Backend Developer at Acodez IT Solutions Pvt. Ltd., I designed, developed, tested, and maintained high-quality products for client websites. My key tasks included:

Creating high-quality products tailored to client needs.

Collaborating on new features and functionality.

Writing clean, well-documented, maintainable, and scalable code.

Testing and debugging scripts.

Staying updated on market trends, best practices, and security protocols.

Continuously optimizing performance and user experience.

My experience at Acodez IT Solutions includes:

Proficiency in PHP and backend development.

Knowledge of Laravel, JavaScript, ReactJS, VueJS, SCSS, CSS, MySQL, and HTML.

Familiarity with APIs and third-party APIs.

Strong problem-solving skills and attention to detail.

Excellent communication and teamwork abilities.

I was dedicated to delivering top-notch solutions and collaborating effectively with my team. At Acodez IT Solutions, we valued innovation, collaboration, and a passion for technology. It was an honor to be part of such an amazing team and work on challenging projects that helped me grow as a Backend Developer.

## iExperto

### Full-Stack PHP Developer

January 2019 - November 2020 (1 year 11 months)

Canada

Designing, developing, and maintaining dynamic and interactive web applications using PHP and JavaScript. Collaborating with cross-functional teams to gather requirements and translate them into technical solutions. Writing clean, efficient, and secure code following industry best practices and coding standards. Ensuring proper functionality, performance, and user experience across different browsers and devices. Integrating third-party APIs and web services to enhance application functionality and data exchange. Managing databases, including designing efficient structures and optimizing SQL queries.

Conducting thorough testing, debugging, and troubleshooting to identify and resolve software defects and technical issues. Refactoring existing code to improve performance, readability, and maintainability. Collaborating with team members and participating in code reviews to ensure code quality and adherence to standards. Documenting technical specifications, processes, and procedures related to application development and maintenance.

Providing technical support and guidance to team members, fostering knowledge sharing and growth. Staying updated with the latest PHP frameworks, tools, and industry trends to drive innovation and efficiency.
